KEY RANCH

"Unlocking Higher Potential"

Annual Production Sale

Hello Everyone,

And welcome to our 2025 Annual Production Sale. We are excited for you to evaluate another year's worth of vision for and work from our breeding program. Whether it be a Spring or Fall born, we're providing a Higher Potential bull for your use. In both cases, we're offering you the opportunity to utilize a more mature animal that has been developed with longevity and athleticism in mind. In addition, we are offering bred heifers that are graduates of a development program that emphasizes an approach toward high-functioning, enjoyable, and profitable females.

In the bull section you have a shot at participating with a larger volume of bulls sired by herd sires from our program. Selecting the top performing males from each of our calf crops, we are collecting semen and putting them to work through artificial insemination and/or natural service breeding. You see us flexing that muscle more than ever in this sale line-up. We are proud of and grateful for how well those sons are competing; having claimed some of the top weights at both weaning and yearling weight measurements.

You will notice continued growth in the number of bred heifers offered for sale and the same dedication to quality. We have been pleased to hear from so many of you who purchased bred females from us a year ago and thankful for the ongoing success you're having with them.

Thank you to all our loyal customers; we have growing admiration and respect for all of you and the quality and sincerity of your work

See you soon,
Kaleb & Erin Kuck

WATCH AND BID LIVE

New bidders should register and apply to bid at least 24 hours prior to the sale.

For questions and tech support,
call 402-316-5460.

Welcome

SALE LOCATION:

28275 HWY 183
Miller, NE 68858

SALE DAY TELEPHONES:

Kaleb Kuck (308) 991-2234
Erin Kuck (308) 991-9650

AUCTIONEER:

Matt Lowery – (308) 750-6119

SALE ORDER:

Official sale order will be announced / available sale day.

TERMS AND CONDITIONS:

Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf).

ANNOUNCEMENTS:

Announcements from the auction block take precedence over any printed material.

HERD HEALTH:

All cattle will sell with proper health papers for interstate shipment.

PAYMENT:

All cattle are to be paid for in full, sale day. All payments are to be made to KEY Ranch.

DELIVERY:

See terms on page 5 for bull delivery.
Bred Heifers - Trucking is the responsibility of the buyer.

INSPECTION OF THE CATTLE:

Cattle will be available for viewing at our operation anytime leading up to sale day. Please feel free to come early on sale day, December 13th, 2025 to view the sale offering and enjoy cinnamon rolls and coffee.

DVAUCTION:

For anyone who is unable to attend; cattle can be purchased sale day through www.dvauction.com an internet site for live cattle auctions. Anyone interested in this option should contact DV Auction at (828) 421-3446 for proper instructions or arrangements before the start of the sale.

STORM DATE:

Watch for any sale postponement or announcement on our website www.key-ranch.com or you can call or text Kaleb or Erin at the numbers listed above for further information.

RINGMEN:

Randy Rasby – American Cattlemen
(308) 539-6195

Chris Beutler – Livestock Digital
(402) 380-8244

Will Harsh – American Angus Association
(740) 272-1386

Cody Nye – Tri-State Livestock News
(308) 760-8588

***Free lunch will be provided sale day,
compliments of KEY Ranch.**

RETAINED SEMEN INTEREST

KEY Ranch is retaining a 1/3 semen interest in all of the bulls in this sale offering. The buyer receives their 2/3 semen interest, full possession and full salvage value.

FIRST YEAR BREEDING SEASON GUARANTEE

There is a first year breeding season guarantee on all bulls in this sale offering. In the event of an issue(s) arising during the first breeding season we will resolve the matter with a case-by-case approach, by giving our customer(s) two options.

Option 1: Sale credit to be used upon the purchase of another bull from the next KEY Ranch Annual Production Sale. We define sale credit as the original purchase price minus any possible salvage value (salvage value going directly to the customer).

Option 2: A replacement bull from our operation of satisfactory quality, if available.

*Blatant negligence in animal care will be frowned upon.

DNA - PARENTAGE TESTING

We're very passionate about the importance of accurate data. We utilize DNA parentage testing by testing every new-born calf each year. This comes at a considerable financial cost as the testing isn't cheap, but we want to be 100% confident in the accuracy of each individual animal's pedigree / lineage. This not only solidifies the trueness of their pedigree but also makes our EPDs all the more accurate as the data (weights, measurements, etc.) that we submit to the American Angus Association are tied to the correct Sire and Dam.

GUARANTEES:

Bulls:

- All bulls in this sale are either virgin bulls or have tested negative for trichomoniasis.
- All bulls have been selected for structural soundness.
- All bulls have been de-wormed, poured for lice, received 7-Way vaccination, and have been vaccinated against respiratory diseases.
- All bulls have passed a breeding soundness exam provided by Overton Veterinary Services.
- All bulls have been determined by testing or lineage to be free of the following genetic defects:
 - AM – Arthrogryposis Multiplex (Curly Calf Syndrome)
 - NH – Neuropathic Hydrocephalus (Water Head)
 - CA – Contractural Arachnodactyly (Fawn Calf Syndrome)
 - OS – Osteopetrosis (Marble Bone Disease)

Bred Females:

- All Bred Females in this sale offering have been vaccinated for Brucellosis (Bang's Disease)
- All Bred Females have been de-wormed, poured for lice, received 7-Way vaccination, have had the first round of Scour Bos 9, and have been vaccinated against respiratory and breeding diseases.
- All Bred Females have been determined to be pregnant having undergone a pregnancy exam provided by Overton Veterinary Services.

*Any questions regarding the health program of the cattle in this sale offering please feel free to contact Dr. Elliot Linsenmeyer of Overton Veterinary Services at (308)-324-7202.

Bull Wintering and Delivery

We are offering free feed and care through delivery for all bulls that sell for \$4,000 or more. Wintering is available for bulls that sell under \$4000 for \$80/month. We will provide this service as another way of showing our gratitude for your support & purchase(s). Also, this allows us to put the finishing touches on developing the bulls, having them in optimum breeding condition upon delivery to the customer, with bull deliveries beginning the first part of March, 2026. Free delivery within the state of Nebraska, \$100 per bull delivery charge for states immediately surrounding the state of Nebraska. Areas of the U.S. outside of that we will split delivery costs 50/50 with the customer.

Facilities and people will be available to help load out the bred heifers on sale day or, if needed, within the week following the sale.

In the bull offering we utilized HD50K testing. You will notice their percent rank for each trait shown in the area just above the footnotes. The lower the number the better, the number represents where they rank within the Angus breed compared to other animals that have undergone the same genomic testing.

- His dam is a little above average height. One of our favorite cows and is on the list to utilize as a donor cow.
- Super pleased with how he has performed since birth; earning strong growth ratios: Weaning ratio = 108, Yearling ratio = 109.
- Another positive attribute he carries is herd longevity that runs several generations deep.

- His dam is one of the bigger frame size cows of her generation.
- KEY - Range Ready the sire of Lot 6 is a bull that we raised and selected to retain for natural service use in our herd. Always monitoring each generation of calf crops and selecting the top performer(s), he was a standout for growth having ratioed as follows: Weaning ratio = 113, Yearling ratio = 110. We have bred his dam back to Ellingson Rangeland several other times and each time the resulting progeny has excelled.
- Genomically Lot 6 is in the high ranks of the breed for Weaning and Yearling Weight, Teat and Udder, Heifer Pregnancy, Angle, Maternal Weight and Height, and Carcass Weight.

- Much like the description in the footnotes of the Lot 6 bull, Lot 7's sire KEY - Driven is another bull we raised that dominated his contemporary competition earning a Weaning ratio of 124! His S A V Regard 4863 bred dam is a cow that we are continuing to utilize as a donor cow. She has an attractive build and currently has a nursing ratio of 5 @ 109. Once the decision was made to retain Driven we collected semen from him and have utilized him through artificial insemination and natural service breeding.
- Impressive personal performance by the Lot 7 bull excelling in weight gain with an EPD profile that's superior for Scrotal & Heifer Pregnancy, along with Teat and Udder.
- The dam of Lot 7 is one of the best Tehama Tahoe B767 daughters in our herd. She is just a little under average height with a real broody build.

- Lot 8 introduces progeny from another herd bull we raised and retained for use through artificial insemination and natural service breeding. KEY - Phase One the sire of Lot 8 is a direct son of one of our top donor cows Brads Birdie Barton 4041. Some of you may recall the very popular 4041 x Sitz Barricade 632F flush brothers that topped our 2024 production sale. KEY - Phase One is a maternal brother to those flush brothers. With intentionality we bred 4041 to Flying V Transformer in hopes of producing a herd sire prospect. Phase One is the result of that mating, he has not disappointed, laying claim to an individual Weaning ratio of 115. He has pretty much done what we expected him to do, adding rib and hip shape, softening edges and adding eye appeal, increasing docility, and consistently siring calving ease.
- There is a lot to like about Lot 8 with his eye appeal, an abundance of maternal traits from both sides of his pedigree and the reliability for performance.

- His dam will turn 13 years old next spring. She's been a reliable cow year after year, very attractive phenotype and disposition. Desiring to further capitalize on her positive attributes we started flushing her and she is still an active donor cow in our herd.
- Lot 13 is an embryo transfer calf who is a full brother to the Lot 41 bull in this sale offering.
- Impressive EDP stats for Dry Matter Intake (DMI), Scrotal, Milk, Teat and Udder, Maternal Height, PAP, and Hair Shed.

- A description of Lot 14's dam would depict a cow of nearly optimum height and efficient body type. Impressive nursing ratio and overall functionality.
- Lot 14's sire KEY - Strut is yet another stand out performer we raised that hails from the same generation as Phase One and Driven, both mentioned in earlier footnotes. As a calf Strut posted an adjusted weaning weight of 804 lbs. ratioing 110. Impressed by his performance and knowing the quality of his mother who is a donor cow in our program, we decided to keep Strut for our own use. Strut was the first to produce viable semen for collection of that trio of 2021 born bulls we kept as herd sires (Phase One, Driven & Strut). The Strut sired calves have excelled in weaning weight production, stout sons and feminine daughters. His daughters are exhibiting strong mothering ability and milk production.
- We are very confident in Lot 14 delivering satisfactory results as a power cow bull. His genomic test results show him shining in the areas of Teat and Udder, Functional Longevity (FL), Maternal Weight, and Marbling.

- His dam is one of our top females, she is a bit above average frame and always in good fleshing condition. She is a cow that we plan to flush embryos from at some point in the near future.
- Not only does this guy impress in terms of physique but also how he's genetically geared toward overall soundness and traits that enhance longevity. He ranks in the top 2% of the breed for Functional Longevity (FL) & PAP EPD's. He also ranks in the top 10% of the breed for Angle and the top 25% for Docility and Maternal Weaned Calf Value (\$M).

- His dam, a granddaughter of our 4041 donor cow, is a little bigger than average frame and carries many of her grandam's positive physical and genetic traits.
- He is recognized by the breed as being in the top 15% for the following EPD's – Residual Average Daily Gain (RADG), PAP, Hair Shed (HS), Marbling, Grid Value (\$G) and Beef Value (\$B). They also acknowledge him as being in the top 20% for Birth Weight EPD and Combined Value (\$C) as well as the top 25% for Calving Ease Direct, Milk & Feedlot Value (\$F).
- Attractive and profitable blend of calving ease, eye appeal, power, performance and higher carcass value.
- Safe for use on heifers.

- His 2012 born Rainmaker dam, had a long career for us, she was always a pleasure to work around, and we enjoyed watching her work.
- Another stout cow bull that is ready to go to work for you.
- Genomically he is in the top 13% of the breed for Tenderness, and the top 20% for Ribeye. In terms of EPD's he ranks in the top 15% of the breed for Fat Thickness (FAT).

- Lot 20's dam is of average build both in height and weight. Over the years she has produced stylish offspring that stand out visually.
- This bull is ready to go to work for you. Always attentive to his surroundings he doesn't miss much and at times has exhibited a pattern of balking at being handled in areas of surprise. We expect him to be the type that can outbreed most other bulls but will prefer to be handled with extra thought and care.
- Lot 20 did well compared to the rest of the breed in the results of his genomic testing, where he ranked in the top 30% of the breed or better in 10 different traits. He shines the most in the areas of growth / gain, foot quality, functionality and longevity, and his ability to thrive in high altitude environments.

- His 2010 born dam was a freckle over average frame size, super broody and was a member of our team for a long time.
- If you're a producer looking to improve foot quality this bull will help you in doing that. He ranks in the top 2% of the breed for Claw EPD and the top 4% for Angle EPD. He ranks toward the top of the breed in several other areas, those EPD's being PAP - top 3%, and Milk - top 10%.
- Calving ease Driven son, some of the stats on him may lead one to believe that he would work on heifers but in our experience, there is enough birth weight in the pedigree that it would be best to use this guy on mature cows only.

- His dam is a very showy Connealy Cool 39L daughter who has grown to be slightly larger framed.
- The Showman sired calves really exceled after weaning, in talking to another producer who used Schiefelbein Showman 338 they witnessed the same thing.
- Compared to the rest of the breed this bull shines in the areas of Docility, Residual Average Daily Gain (RADG), Yearling Weight, Claw, Milk, PAP, Fat Thickness (FAT) and Feedlot Value (\$F).
- Safe for use on heifers.

- His dam is powerfully bred and yet carries that in a fairly moderate package. Future donor cow for our program, she is scheduled to be flushed next spring, capitalizing on her ancestry.
- There is quite a buzz building around this bull, a visual stand out. Impressive on paper too specifically with his big Ribeye EPD and his Cow Energy Value (\$EN) EPD.
- Safe for use on heifers.

- His mother is one of our herd favorites, slightly larger statured cow with a lot of width and depth. Fantastic mothering and fleshing ability. Not to mention the fact that she is a direct daughter of our powerful donor cow 4041 who is honored throughout the catalog.
- We're really pleased with this powerful and attractive Thedford son. There is not only a lot to him but a lot to like about him. He ranks in the top 1% of the breed for Heifer Pregnancy EPD! Some other traits where he excels are Calving Ease Direct, Birth Weight, Docility, Cow Energy Value (\$EN), Marbling, PAP & Maternal Weaned Calf Value (\$M).
- Safe for use on heifers.

- 429M is a spring born embryo transfer calf, another unique blend of genetics that we're offering to you in the form of Sitz Investment 660Z X Brads Birdie Barton 4041, the donor cow that you see referenced and genetics influenced by throughout our catalog.
- If you were to measure the testosterone level of all the bulls in the offering, we would venture to guess that Lot 33 would either win out or be among the top contenders. Our prediction is that he is going to be able to handle a lot of breeding duties.
- Ultra maternal ancestry. Notice too, how he is another bull in the line-up that is in the top 1% of the breed for the Heifer Pregnancy EPD, a trait that we are sticklers on when selecting and mating genetics.

- Lot 37 is a maternal brother to our herd sire KEY - Strut. Their mother is a donor cow in our herd that we continue to flush. 4029M, a natural born calf by that cow gives all of you an opportunity to participate with genetics that are proven and impactful.
- Powerfully and attractively built. Moderate birth weight cow bull.
- He ranks in the top 2% of the breed for Udder EPD, top 10% for Heifer Pregnancy, Teat, and Marbling EPD's. Both his demeanor and Docility EPD confirm his excellence in that trait.

- His dam will turn 13 years old next spring. She's been a reliable cow year after year, very attractive phenotype and disposition. Desiring to further capitalize on her positive attributes we started flushing her and she is still an active donor cow in our herd.
- Lot 41 is an embryo transfer calf who is a full brother to the Lot 13 bull in this sale offering.
- Impressive EDP stats for Dry Matter Intake (DMI), Scrotal, Cow Energy Value (\$EN), PAP, Hair Shed (HS) & Fat Thickness (FAT).

- Progeny of a cow that is geared toward feed efficiency and transmitting the likelihood for larger scrotal size, as confirmed and witnessed through this bull.
- 438M ranks in the top 2% of the breed for Calving Ease Direct and Scrotal EPD's. The spotlight is also on him for Birth Weight, Heifer Pregnancy, Calving Ease Maternal, Cow Energy Value (\$EN), PAP & Marbling EPD's.
- Safe for use on heifers.

- A little under average frame size would best describe his dam.
- Here is a nifty combination with Phase One crossing on Rangeland and boy look at the results! Top 2% of the breed for Teat & Udder EPD's, top 10% for Milk EPD, and high accolades for Dry Matter Intake (DMI), Heifer Pregnancy, Cow Energy Value (\$EN), Ribeye & Maternal Weaned Calf Value (\$M).
- Safe for use on bigger heifers.

- Lot 44 is an embryo transfer calf out of another powerful donor cow from our herd. She is bigger framed but not as big as some of our other Payweight daughters. Impressed with her performance, cranking out winners no matter who we breed her to and liking her pedigree, it's no surprise that she is among the elites that make up our donor cow unit. In addition to Lot 44 we're excited to offer a handful of other embryo transfer sons by her in this sale offering: Lots - 50, 51, 54, 56 & 58.
- 468M is a dang good-looking bull, super stylish & long bodied with good depth and width.
- He shines the most on paper for his solid figures for the following EPD's - Teat, Udder, Dry Matter Intake (DMI), Cow Energy Value (\$EN), Angle, Calving Ease Maternal & Functional Longevity (FL).

- The grandam of Lot 45 is a now deceased donor cow from our breeding program. We have high hopes for her daughter 040H, the mother of Lot 45. She shares many similarities to her mother including her ideal frame size.
- Confirmed through genomic testing Lot 45 ranks in the top 30% of the breed for 9 different traits, the best of which are Teat & Udder.

- *Lot 48 is the 1st of a dozen fall born embryo transfer calves in our sale offering. Our fall herd is completely dedicated to generating more progeny from our best genetics through embryo transfer and retaining resulting flush daughters from those donor cows. 4204M is out of one of our younger donor cows; she's incredibly easy fleshing, of average height, and with extreme depth and width.*
- *We're really pleased with this flush mating they have a lot of eye appeal and have a toolbox full of valuable traits that are geared toward profit and creating cattle that are pleasant to work with.*
- *4204M ranks in the top 2% of the breed for Milk EPD, the top 10% for Hair Shed (HS), and the top 20% for Birth Weight, Heifer Pregnancy, Teat, Maternal Weaned Calf Value (\$M) and Weaned Calf Value (\$W) EPD's.*
- *Lot 48 is an embryo transfer calf who is a full brother to Lots - 53 & 55 in this sale offering.*
- *Safe for use on heifers.*

- 4209M is out of one of our younger donor cows; she's incredibly easy fleshing, of average height, and with extreme depth and width.
- We're really pleased with this flush mating they have a lot of eye appeal and have a toolbox full of valuable traits that are geared toward profit and creating cattle that are pleasant to work with.
- 4209M ranks in the top 3% of the breed for Milk EPD, the top 4% for Weaned Calf Value (\$W) & the top 10% for Claw & Hair Shed (HS) EPD's.
- Lot 55 is an embryo transfer calf who is a full brother to Lots - 48 & 53 in this sale offering.
- Safe for use on heifers.

- His dam will turn 13 years old next spring. She's been a reliable cow year after year, very attractive phenotype and disposition. Desiring to further capitalize on her positive attributes we started flushing her and she is still an active donor cow in our herd.
- Lot 57 is an embryo transfer calf who is a full brother to lots - 49, 52, & 54 in this sale offering.
- 4222M has a number of EPD's where he ranks among the best in the breed; here is a summary of his status:
 - Top 3% - Scrotal
 - Top 15% - Docility, Hair Shed (HS)
 - Top 20% - Maternal Weaned Calf Value (\$M), Weaned Calf Value (\$W)
- Safe for use on heifers.

- Lot 58 is an embryo transfer calf out of another powerful donor cow from our herd. She is bigger framed but not as big as some of our other Payweight daughters. Impressed with her performance, cranking out winners no matter who we breed her to and liking her pedigree it's no surprise that she is among the elites that make up our donor cow unit.
- Ultra maternal, power cow bull. Moderately built with a lot of muscle expression. He has several high rankings in the breed EPD's, those being: Teat, Udder & Cow Energy Value (\$EN) - top 4% and Dry Matter Intake (DMI) - top 10%.
- Lot 58 is an embryo transfer calf who is a full brother to lots - 50, 51, & 56 in this sale offering. He is also a maternal brother to Lot 44 in this sale offering.

- Lot 59 is an embryo transfer calf who is the highlight progeny from yet another donor cow from our breeding program. His dam, a big framed Payweight daughter has an excellent nursing ratio with 8 calves @ 108. She is also a maternal sister to the dam of Lot 60. 4208M's grandam is still one of my all-time favorite cows; she too had a great nursing ratio with 9 calves @ 102. Had we had our embryo transfer program rolling back then she'd have been a donor cow for sure.
- 4208M seems to be a little slower maturing but he has changed a lot in the past 45 days. The goods are there, we assure you. Don't pass up the opportunity to add this guy to your breeding program!
- Safe for use on bigger heifers.

Lot 60 through Lot 77 are bulls that performed natural service breeding as yearlings; they were vaccinated with Virashield 6 VL5 HB prior to turn-out. A number of them were used within our own herd and or clean-up breeding the bred heifers that are a part of this sale offering. We had a few customers call us this past breeding season sharing with us circumstances ranging from older bulls not passing fertility testing to yearling bulls purchased from other breeders that weren't performing or holding up in body condition and or function. These customers asked if we could help them get through the breeding season and so we put a few of our bulls to work to help them cover their breeding needs for the year. All the non-virgin bulls in this sale offering were trich tested after breeding season and are guaranteed as being trich free.

- Lot 60 is a spring born embryo transfer calf whose dam is a deceased maternal sister to the dam of Lot 59 and another example of the power and prestige of their mother and the grandam of both Lots 59 & 60. Not even being planned beforehand, it's neat how both daughters earned their right into donor cow status in our program. 485M's dam has a nursing ratio of 11 calves @ 104. She had ideal frame size and exhibited good fleshing ability. She still ranks in the top 5% of the breed for Milk EPD.
- Fully loaded pedigree, in addition to all he possesses on the bottom half of his pedigree; on the top half he has the influence of 4041, the powerful donor cow that is making such a positive and lasting impact on our herd in so many ways.
- 485M has a number of EPD's where he ranks well compared to the rest of the breed, these being: Calving Ease Direct - top 1 %, Birth Weight - top 2%, Milk & Functional Longevity (FL) - top 10%, Scrotal, Heifer Pregnancy & Calving Ease Maternal - top 15%.

- The product of a little larger frame size cow who is slated to become a donor cow in the future. Not only does she have an impressive nursing ratio, but she's a beautiful cow with a great disposition.
- Moderate birth weight cow bull who ranks in the top 1% of the breed for the Calving Ease Maternal EPD. Other notable EPD rankings are Weaning Weight, Claw & Weaned Calf Value (\$W) - top 20%, Yearling Weight - top 25%.
- As a yearling, we used this bull for natural service breeding within our own herd.

- Broodiness runs several generations deep through his mother's lineage. She is a shorter statured cow who ranks in the top 25% or better of the breed for 13 different EPD's, the best of which is the Docility EPD where she ranks in the top 2%.
- Like his mother Lot 62 has a number of EPD's where he ranks well compared to the rest of the breed. The best of his EPD rankings are: Calving Ease Maternal - top 1% & Docility - top 5%.
- With his moderate to smaller body size there is a good chance that, if played right Lot 62 could be used on heifers for quite a bit of his career before he gets too big.
- We expect this bull to sire some really fancy heifer calves.

- 4015M is a natural born calf out of another one of our donor cows. She currently has a nursing ratio of 6 @ 105. She is little bigger framed and another gem to work around. She ranks in the top 10% of the breed for the Maternal Weight EPD, which she demonstrates physically too with her abundant body depth and width.
- Lot 63 is a big dude who is very showy, correct and good natured. He dominates in all areas pertaining to growth EPD's compared to the breed: Maternal Weight – top 1%, Yearling Weight – top 4%, Weaning Weight & Maternal Height – top 10%, Yearling Height – top 15%.
- He earned an adjusted weaning weight of 809 lbs. ratioing 115, and an adjusted yearling weight of 1,340 lbs. ratioing 116!!
- As a yearling, we used this bull for natural service breeding within our own herd.

- Here is another big bodied bull who has done well for himself rationing 110 at weaning and 107 at yearling. He has strong credentials across the board in terms of EPD's that pertain to producing pounds and body size.
- His dam is a big cow that is about as consistent as they come. She too has punched her ticket to become a donor cow for us in the near future. Not only does she have a strong nursing ratio but even at her age she ranks well against the breed for growth EPD's.
- As a yearling, we used this bull for natural service breeding within our own herd.

- No stop signs with this bull, he is ready to take you down your own road of success.
- Lots of capacity and shape to Lot 65, he has been pedal to the medal since birth; he ratioed 116 at weaning. His dam is real petite and stems from a line of cows that exhibit that trait.
- Superb trait package for teat and udder quality, as well as feed efficiency and the ability to do well in high altitude environments.
- As a yearling, we used this bull for natural service breeding within our own herd.

- His dam is a real feminine young female who is a maternal sister to the lot 65 bull in this sale offering. She is marginally larger framed than others from that cow family.
- 4066M is one of the best bulls in the offering for Marbling & Ribeye EPD's. Super well balanced across all traits.
- As a yearling, we used this bull for natural service breeding on some of the bred heifers in this sale offering and on our own replacement heifers.
- Safe for use on heifers.

- His mother had a heck of a run through her career, she is now deceased, an unfortunate death that reminds us that God is in control. We had high hopes for her future as a donor cow for us. She went out with a bang though, producing this big boy, who earned an adjusted weaning weight of 861 lbs. ratioing 117! One of the heaviest weaning weights of that calf crop. She was a bigger framed cow with lots of maternal instinct.
- Very proud of his sire KEY - Strut who has produced some big weaning weights through his progeny. His daughters are doing a great job for us as young mother cows.
- Powerful cow bull who is ready to generate big profitable cattle for you.

- He certainly gets some of his good looks from his mamma; she herself is a beautiful young cow with extra femininity and style. She has ideal frame size and great length of body.
- Loads of capacity through his build, super soft made and exceptionally attractive.
- Look to this bull for transmitting a lot of fertility, eye appeal and correctness into his progeny.
- As a yearling, we used this bull for natural service breeding on some of the bred heifers in this sale offering.
- Safe for use on heifers.

- The mother of Lot 69 is a maternal sister to the dam of Lot 30. Their dam by S A V Regard 4863 is among the elite of our cows. We would place her in the top 5 of our entire herd for sheer mothering ability.
- 4051M is a big Ribeye EPD bull with excellent foot quality traits.
- He is of a shorter stature but demonstrates nice muscle expression and is easy on the eyes.
- As a yearling, we used this bull for natural service breeding on some of the bred heifers in this sale offering.
- Safe for use on heifers.

- We sure enjoy the mother of Lot 70. She's a gentle, big middled cow of average height that stems from a cow family that has served us well for a long time.
- Lot 70 is near the top of the breed for Scrotal & Milk EPD's ranking in the top 10% for both.
- Great option for cow breeding and carries with him solid traits for longevity.

- His dam is in the category of bigger than average but not super big framed. Many of the cows in her lineage have been known for being good natured and easy fleshing.
- I'm pretty partial to this big ole dude. He is one of the bigger framed bulls in the offering. He could use a little more muscle expression and yet in his own way he has some style.
- Excellent foot quality traits and high-altitude tolerance.

- His dam is larger framed and she herself possesses some strong growth figures and a big Scrotal EPD where she ranks in the top 3% of the breed for that trait. She also ranks in the top 15% for the Heifer Pregnancy EPD.
- Lot 77 offers you an opportunity to participate with a sire group that has been popular across the country.
- If you're looking for cattle with grow this guy has got what you want. Big height EPD's, and solid weight EPD's; especially the Maternal Weight EPD where he ranks in the top 10% of the breed.
- As a yearling, we used this bull for natural service breeding on some of the bred heifers in this sale offering and on our own replacement heifers.
- Safe for use on heifers.

Brads Birdie Barton 4041

The commercial bred heifers will sell in groups of 5-9 head. All head must be taken within that group, if purchased. Buyer with top bid has the opportunity to take up to 40 head at which point the bidding will restart.

Whoever wins the bid will be allowed to choose whichever group they want from the KEY Ranch Commercial Heifers. A customer could therefore put together a potload of heifers all due around the same time from being able to grab from several different heifer groups.

Heifers will be pregnancy checked on November 24, 2025
by Overton Veterinary Services.

Buyers have 10 days after sale day to recheck if they deem it necessary.
After that day, all liability belongs to the new owner.

All sale heifers have made it through our strict heifer development standards that include culling for poor phenotype, disposition, and feed efficiency.

KEY Ranch - Commercial Bred Heifer Offering

Artificially Inseminated to the following bulls:

Ellingson Rangeland, BAR Dynamic, Boyd Justification, Koupals B&B Diverse 3181

Natural Service Breeding Exposure to the following bulls:

KEY – Showman 4051M (Lot 63 in this sale offering)

KEY – Phase One 4066M (Lot 66 in this sale offering)

KEY – Phase One 427M (Lot 68 in this sale offering)

KEY – Patriarch 441M

These heifers were purchased as calves / yearlings from three different ranches:

Gurney Ranch of Burwell, NE, Jay & Judy Harnagel of Miller, NE & Livingston Ranch of Stratton, CO.

Gurney Ranch: Long time friends and customers who have purchased a large quantity of bulls from us over the years. Highly reputable family, cowherd and management approach.

Jay & Judy Harnagel: An operation that once ran registered Angus cows; their now commercial herd has ties back to those purebred genetics. Genetic influence from KEY Ranch as well; Jay & Judy have purchased bulls from us in the past.

Livingston Ranch: Recognized for their effort in land preservation; they run their cow herd in an area of limited water & feed resources. A herd management approach that stresses feed efficiency.

Lots 78-125 — Livingston Ranch Heifers

Lot 78 - 84..... Due February 21, 2026 to Ellingson Rangeland

Lot 85 - 91..... Due February 21, 2026 to Ellingson Rangeland
